Subject: Abaco Operations Items/Equipment

For Follow up: 🚨 Urgent Priority. Follow up on 06/22/2020

Mr Stubbs,

It has been a while now since an initial probe into the whereabouts of equipment/items that was sent to Abaco during hurricane Dorian. To my knowledge, this matter is still outstanding and the concern for me, is that I have not seen any of the sent items, for the exception of two (2) portable generators, nor have I heard any further discussions regarding this matter.

I am also concerned, that if this situation is not concluded soon, that I could be factored into this equation since being the Abaco Operations Manager since March of 2020.

I patiently await your response in this matter of great urgency.

Regards,
